Understanding the purpose and features of SORER

Tuesday, 28 May 2024 10:50 (10 minutes)

SORER (Somali Research and Education Repository) is a digital repository that serves as a centralized platform for storing and sharing research and educational resources. Its key features include:

1. Resource Storage: SORER allows researchers and educators to deposit and store various types of scholarly outputs, including research papers, datasets, theses, and educational materials.

2. Access and Discovery: The repository enables easy access to deposited resources, facilitating their discovery by the SomaliREN community and beyond.

3. DOI Integration: SORER supports the assignment of Digital Object Identifiers (DOIs) to deposited resources, ensuring persistent and citable links for long-term accessibility.

4. ORCID Integration: Integration with ORCID enables researchers to showcase their work and affiliations, ensuring accurate attribution and recognition.

5. Community Feature: SORER, based on Zenodo, offers community-based collaboration, enabling users to create and join communities based on research interests or institutional affiliations.

These features make SORER a valuable platform that enhances research visibility, facilitates collaboration, and promotes the dissemination of knowledge within the SomaliREN community.
